

DRUVAN G N

Trainee Engineer (SDE1) | Backend & Applied AI

druvangurkar20@gmail.com | +91 63619 67951 | [Portfolio](#) | [Linkedin](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

Backend and AI engineer working across Java, Spring Boot, .NET, and Python, with a growing focus on multi-agent systems and GenAI (LangChain, LangGraph). Comfortable owning a feature end-to-end — API design, auth, data layer, deployment. Currently training at Hashedin by Deloitte across backend and applied AI tracks.

SKILLS

Languages & Frameworks: Java, Spring Boot, Python, FastAPI, Flask, .NET/C#, React, Angular

AI & Data: LangChain, LangGraph, RAG, CNN, Random Forest, PySpark, ChromaDB, MongoDB, MySQL

Other: JWT/OAuth, OWASP, Kafka, Docker, Git, GCP

EXPERIENCE

Trainee Engineer (SDE1), Hashedin by Deloitte

April 2026 – Present

Mysuru, India

Training across backend and applied AI, rotating through Java/Spring Boot, .NET, Angular, Python/GenAI, and data engineering.

- Built AI Agent Factory, a pipeline that turns BRD/PRD/TRD documents into working code through three agent workflows, with human review and checkpointing so long tasks can pause and resume
- Worked on a multi-agent ETL modernization system (team of 6) — built the retrieval layer with PySpark and ChromaDB, added LangSmith tracing so we could actually debug what the agents were doing
- Designed the backend for a Kafka-based leaderboard service in Spring Boot, then built its Angular frontend
- Built FoodieHub on my own time — a .NET food-delivery backend with proper auth (JWT, RBAC) and OWASP hardening
- Put together Nexus Copilot, a RAG assistant on Databricks, and a Random Forest model for demand forecasting (86% accuracy) on an e-commerce dataset
- Learned AIDLC as an alternative to standard SDLC, and spent time on prompt/token optimization to keep agent costs down

DSA & Java Mentor, Peer Tutor (Campus)

Jul 2024 – Jul 2025

Mysuru, Karnataka, India

- Guided problem-solving and core Java fundamentals for peers; reinforced DSA patterns through structured practice

Data Analysis & Frontend Development Intern, IBM SkillsBuild

Jun 2024 – Jul 2024

Remote

- Collaborated on a full-stack job portal covering authentication, roles, and application flows; contributed to retail sales analysis for store insights

Python Development Intern, InternLeap

Oct 2023 – Nov 2023

Remote

- Built ML workflows using scikit-learn, pandas, and NumPy; applied Python for data cleaning, feature preparation, and model training

PROJECTS

OralCare AI | Python, Flask, React, MongoDB, CNN, Random Forest

- Built an AI-fusion oral cancer screening platform combining CNN image classification with Random Forest risk modeling on patient data, with a Groq/LLaMA-3 chatbot for user questions
- Implemented secure auth (JWT, OTP, BCrypt) and an accessible, WCAG-compliant frontend

Job Portal | Java, JDBC, MySQL, React

- Full-stack job portal built with a team of 8; cut backend API response times by ~40%, tested with 30+ users
- Owned the authentication and role-based access module within the team

EDUCATION

B.E., Computer Science (AI & ML) — Vidyavardhaka College of Engineering, Mysore | 2022–2026 | CGPA: 9.3

CERTIFICATIONS

MySQL Database Development (Udemy) · JDBC (SimpliLearn) · Python for Data Science & ML (IBM)
