

DRUVAN G N

Software Engineer - Backend & Applied AI

druvangurukar20@gmail.com | [+91 63619 67951](tel:+916361967951) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

Software Engineer with hands-on experience across backend systems and applied AI - building REST APIs, microservices, and scalable backend systems in Java, Spring Boot, .NET, and Python, alongside multi-agent AI and GenAI pipelines using LangChain and LangGraph. Comfortable owning a system end-to-end: system design, authentication/authorization (JWT, OAuth, OWASP), data layers, and cloud deployment (GCP). Strong record of shipping production-grade systems in fast-paced, team-based environments.

CORE SKILLS

Backend: Java · Spring Boot · Python · FastAPI · .NET/C# · REST APIs · Microservices Architecture · System Design · Distributed Systems

Applied AI: LangChain · LangGraph · RAG · Multi-Agent Systems · Deep Agents

Security & Reliability: JWT / OAuth · OWASP Security · Idempotency & Retry Handling · Observability (LangSmith) · Debugging

Data, Infra & Frontend: SQL · MySQL · PySpark · ChromaDB · Kafka · Docker · Git/GitHub · Jenkins · CI/CD · GCP · Angular

Practices: Unit & Integration Testing · Agile (Sprints/Standups) · Git Workflows · API Documentation

EXPERIENCE

Trainee Engineer (SDE1) - Hashedin by Deloitte

April 2026 - Present | Mysuru, India

ETL Migration Intelligence System - Python, FastAPI, LangChain, LangGraph, Deep Agents, PySpark, GCP, ChromaDB, LangSmith

- Core contributor on a multi-agent AI platform automating legacy ETL modernization for enterprise data pipelines on GCP, built in Python/FastAPI.
- Built the retrieval layer on PySpark and ChromaDB, using a CodeGraph-based knowledge graph (Obsidian) to map cross-pipeline dependencies, and instrumented the system end-to-end with LangSmith for observability.

AI Agent Factory - FastAPI, LangGraph, WebSockets, SSE, ChromaDB, SQLite

- Designed a document-to-code pipeline covering three distinct agentic workflows with human-in-the-loop review.
- Built the review layer (WebSockets, SSE streaming) and state persistence (LangGraph checkpointing) so long-running tasks pause for review and resume reliably.

FoodieHub - .NET 8, C#, JWT, OWASP

- Independently designed and built a food-delivery backend end-to-end in .NET 8/C#, from data modeling through deployment.
- Implemented JWT authentication, role-based access control, and OWASP-compliant security hardening across all API endpoints.

Smartwatch Leaderboard System - Spring Boot, Java 17, Kafka, MySQL, Spring Data JPA

- Owned the backend for a real-time leaderboard service, designing the event-driven data flow (Kafka) for device feature-tag matching and geo-scoped challenges.

Smartwatch Leaderboard UI - Angular 20, NgRx, RxJS

- Built the Angular 20 + NgRx front end for the leaderboard service, consuming the Spring Boot REST contract.

ADDITIONAL PROJECT

Job Portal - Full-Stack Web App - Java, JDBC, MySQL, React

- Full-stack job portal (team of 8) with secure auth and role-based access; optimized backend REST APIs for ~40% faster response times, validated with 30+ test users.

PORTFOLIO

Full write-ups, architecture diagrams, and live links for every project above: druvan20.github.io/druvan-portfolio

EDUCATION

B.E., Computer Science (AI & ML) - Vidyavardhaka College of Engineering, Mysore

2022 - 2026 | CGPA: 9.5

PUC (PCMB) - Marimallapa PU College

80%

SSLC - Marimallapa High School

97%

CERTIFICATIONS

Python for Data Science & Machine Learning (IBM) · MySQL Database Development (Udemy) · Database Connectivity in Java / JDBC (SimpliLearn)
